Volunteers give bog bridges a much-needed facelift.

A bridge in need of repair.

One of our youngest volunteers poses with lumber that will be used in the repairs.

Thanks to the Town of Durham and other local supporters for providing valuable funding to buy supplies (like these boards)!

This effort included partners from The Stewardship Network, The Forest Society, Town of Durham, UNH, and more!

New boards make for safe bridges.

“The event brought...37 volunteers who worked a total of 112 hours. They hailed from 7 different towns, and were aged 5-80. Very cool!” - Malin Clyde of The Stewardship Network

Families and friends turned out for the event, even with the rainy conditions!

Celebrating the day's many accomplishments. Thanks to everyone for a job well done!
